experts in seating[®]

Doing your job with ease. If you can do that then you're a true professional. This also applies to all our expertise. You don't notice it – and that's exactly what makes the difference. Because after a day of sitting at work on one of our work chairs, you still feel great. No lower back pain. No sore shoulders. No restless feeling in your legs. Because we're professionals who invisibly take care of other professionals. And we're very proud of that. With us you'll be sitting pretty.

Take a seat.

page 46

Sitting ergonomically so you can work comfortably and feel fit and flexible. That's our goal. To achieve this, we develop and manufacture ergonomic work chairs that really make a difference. Exercise is important, but we believe sitting has to be healthy as well.

'We' are the approximately sixty problem solvers who are Score. We develop and manufacture our seating solutions in our own factory in Tolbert, in the province of Groningen in the Netherlands. We apply the most recent ergonomic standards, the latest techniques and best materials while taking all the challenges faced by people in sedentary professions into account. People stand at centre stage with us. Or better said, sit!

our own path

At Score, we like to do things our own way. Maybe our designs aren't trendsetting, innovative or super modern, but they are solid, robust and a little quirky. Solid chairs that you can literally use for decades. We don't follow the crowd but pave our own way! We listen to our customers' experiences and base our plans on what they tell us. When we see opportunities for improvement, we investigate together to see how they can be implemented. This has made us a reliable player in the market over the years.

our mentality

We value our relationships very much. Connecting people with short communication lines, honest and transparent; that's what we stand for. We want the best for everyone, both internally – for our colleagues – and externally – for dealers and customers who takes a seat on our products. If you are able to enjoy doing the things that are important to you, and we can contribute to that in our own way, then we're satisfied.

we take the burden off you

You deserve the perfect chair. One you never have to worry about. This may sound a bit vague, but what matters is that our craftsmanship takes the burden off of you. There's always room for improvement. Whether it's our processes, chairs or your sitting posture. Because we may have great ideas, but it's your experience that counts. We improve ourselves by listening – to the market, to the developers of new technologies and to you as a user. *Learning by listening.* That's Score.

our promise

We're problem solvers. Every component in our seating solution has a function and everything is there for a reason. Because quality is all about the details. That's why we call ourselves *experts in seating*. We know the ins and outs of the various industries we develop our products for. Even yours. So we work every day to ensure that you experience this too. That while you're sitting, you really feel that we're thinking along with you... and ahead. We find solutions to problems you didn't foresee yourself. With an eye for detail, with passion and inspiration. Sitting comfortably so you can concentrate on doing your job. That's our promise to you.

a chair for every workplace

There's simply no such thing as one universal (work) chair, perfect for every user and work environment. Different requirements apply to a chair in a workshop than to an office chair. At Score, we made a distinction between four major branches – Dental, Medical, Industry and Office – each with their own specific work stations and associated activities. So we developed a range of seating solutions that take into account both workplace-related requirements and the wishes of the user. After all, sitting comfortably and ergonomically while working is paramount at Score. Whatever you do, wherever you work.

A wide range of branches and professions
So many professions, so many seating solutions. Score has a suitable seating solution for (almost) every work environment, and you'll find us at the most diverse workplaces. Even in branches where chairs must meet very specific requirements. Whatever you do, wherever you work and whatever your build. We have chairs for tall and short people, lighter and heavier people and people with a physical disability. They're available in various fabrics and colours, you can add an array of options for extra support and, of course, they're super comfy. This is how we ensure you sit relaxed and full of energy so you can focus on your job.

We've got your back!

product range!

Of course, our work does not stop at developing, producing and selling chairs. We also give advice, think along and answer every question you have. That's service.

service and warranty

Score chairs are made with craftsmanship from high-quality durable materials in our own factory in Tolbert and are exported to more than 50 countries. Our seating solutions have a standard 5-year warranty. Ask about the exact conditions.

extensive dealer network

Score supplies nationally and internationally through selected dealers only. There's always a Score dealer nearby. Well-trained workplace advisors at Score can advise on the best work chair for your specific workplace in consultation with the Score dealer.

fast delivery service

Through our special fast delivery service, we ship a selection of high-demand chairs within 3 business days. Ask about the exact conditions.

trial period

See an interesting seating solution? Ask your dealer about the possibilities to try out a product.

showroom

You're also welcome to visit our showroom where you can compare the various chairs. From the Mobility work chair to the Arthrodesis chair and the 5000 Line to the MaXX Line, the latter of which can support up to 250 kg or another form of support such as the leg supports: if you make an appointment in advance, our experts will be happy to discuss all the advantages of the seating solution you're interested in.

own product development and production

Bending steel, welding seams, drilling holes: a good product is perfect down to the smallest detail. That's why everything is done with equal care at Score: from assembly to packaging. In our own factory in Tolbert, our technical professionals work on our products with great precision. Products we develop ourselves! And our factory and office are located right next to each other. This means the communication lines between our product developers and production employees are short, allowing us to respond quickly to dealers and customers. We all work with heart and soul on new seating solutions that meet the current ergonomic standards and we keep everything in-house. We enjoy working together and being inspired, but we're also specialists and convinced of our expert craftsmanship. We pave our own way. That's Score!

Sitting comfortably on a super strong design

Are you built a bit taller or heavier than average? Then you don't want to have to wonder whether your chair will 'hold' you. No need to worry with the chairs from the Score MaXX Line. They were made for you. We have these functional powerhouses for people up to 250 kilos in three versions: Small, Medium and Large. They are made of strong, durable, high-quality materials that give you a safe, solid and comfortable feeling while sitting. The seats and backs of the three versions are interchangeable so your MaXX perfectly matches your posture. You can even add a series of handy accessories for more sitting comfort. You'll be sitting pretty on a MaXX.

- For those with a heavier stature
- Available in small, medium and large sizes
- Seat angle adjustable in 3 positions
- With height adjustment by means of a gaslift and back height adjustment by means of a gasspring

Wondering if any of these chairs/stools would suit you? Ask a dealer for the possibilities

comfortable sitting with leg problems

Do you have a long-term injury, a prosthesis or a chronic illness affecting your legs or knees? Do you want to move around whilst seated? If so, our Score 2300 Arthrodesse or the Score 5000 Arthrodesse is just right for you. You can adjust the height of your upper legs separately to give your legs exactly the support they need. Even if you like to sit lower with one leg than the other. A cut-out in the frame allows you to reach the floor with your feet and ride tripping, with small steps through the room. The Score 2300 Arthrodesse or Score 5000 Arthrodesse are height adjustable and standard equipped with an aluminum base: in terms of upholstery, you can choose from three types in a range of colors.

- Ⓢ Ergonomic seat
- Ⓢ Ideal for people with knee or leg problems, due to frame with tripping possibility
- Ⓢ Broader backrest and seat
- Ⓢ Available in various upholsteries and colours

the perfect support for leg injuries

Most people are perfectly able to work in a seated position, but this is not the case for everyone. A problem or an injury with your leg, knee, foot or ankle can make sitting down for long periods of time very difficult. That is where our Legrest comes in. But you can also use it if you simply like to sit with your leg or legs up while working. The Legrest is free-standing, which makes it practical and flexible. We have fitted it with a gaslift with reduced counter-pressure, making height adjustment very easy. It is available with or without smooth-running castors.

- ⊞ An indispensable aid for foot, ankle, knee or leg problems
- ⊞ Various colours available
- ⊞ Easy to adjust in height

fabrics and materials: a world of possibilities

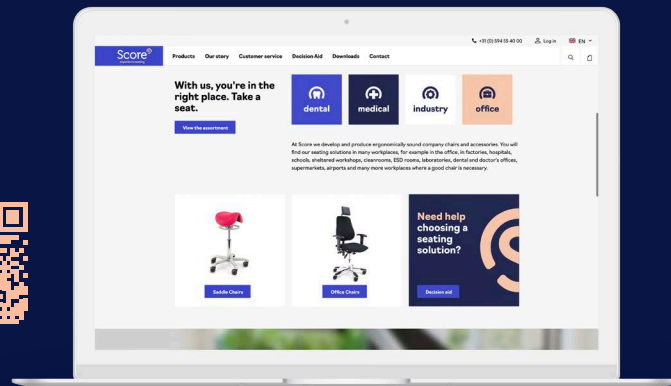

Water resistant, Conductive, Fire retardant, Ventilating. Each fabric and each material has its own unique properties. Handy, because the many various working environments require different seating solutions. But we think further than just the practical aspects. Many of our fabrics and materials are available in a wide range of colours you can choose from. Because we like to give people as many options as possible, so they get a chair that suits them even better. Here's a list of all of them.

our chair, your fabric

Want to send us your own fabric? Even that's possible at Score. If you purchase and deliver the fabric to us (minimum roll width of 1.40 metres), we'll use it for the upholstery. There is an additional cost; you can find the details on our website. We cannot be held liable for the warranty, product quality and processing of the fabric. Want to learn more or discuss? Feel free to contact us. We're here to help you find solutions.

 Weight: 590 g/m²
 Characteristics:

- Large surface area
- Dirt resistant
- Universal use
- Waterproof, fire retardant and easy to clean

People generally spend more time sitting than standing. At home, but mainly at work. And that's not good for our bodies. At Score, we focus on seating solutions, because we believe that sitting should also be healthy.

Sitting comfortably makes work more pleasant and you can concentrate better. After a workday you have more energy left to do fun things and you prevent physical problems. Because employees who sit a lot – have to stand for a long time or make repetitive movements for their work – often force their body into a certain position for a long period of time. When that posture is wrong, it quickly leads to physical irritation and fatigue, which in the longer term can lead to physical complaints, with long-term sick leave as a possible result.

Investing in 'good sitting posture' is a golden investment for companies and quickly pays for itself. It's one of the few affordable ways to increase employee productivity and prevent sick leave.

Happy employees, happy employers!

our solutions to the law of cause and effect

Standing or sitting slightly incorrectly can have big long-term consequences. In the diagram on the right you will find an overview with complaints, causes and a possible solution. Do you have another problem or a question about it? Feel free to contact us. Our well-trained workplace advisers are experts on sitting and will be happy to advise you on the best seating solution for you and your specific workplace.

Complaint

Restless legs, irritation and loss of concentration

Irritation and loss of concentration

Neck and back problems

Fatigue and loss of concentration

Neck and shoulder complaints

Restlessness, lack of concentration and neck and shoulder complaints

Back complaints and fatigue

Cause

Seat is too high, feet don't touch the floor so no possibility to shift position and inhibits blood circulation

Seat depth is too small, so no possibility to shift position

The lack of a (non-adjustable) backrest, resulting in a bent trunk position, unilateral load on the joints and muscles in the back and more difficult breathing due to compression of the abdominal cavity

Unstable chair or seat, the body is constantly trying to find balance

Chair is not rotatable, resulting in uneven strain on the joints and intervertebral discs of the spine and on the ligaments and muscles in the back

The lack of - or inability to adjust - armrests, the body unconsciously searches for possibilities to rest the weight of the arms

Backrest does not provide sufficient support to the lumbar region, which puts too much strain on the spine because it cannot assume its natural position

Solution

Adjust a higher work chair, place a seat to the right height or a separate footrest with foot control

If possible, increase seat depth. Otherwise a work chair with sliding seat

Work chair with adjustable backrest

Work chair with a sturdy and stable base

Rotatable work chair

Install height and width adjustable armrests

Work chair with an ergonomically shaped backrest that fits into the lumbar region

A good work chair helps you do your job. It helps you stay focused, even after hours of desk or precision work in the same position. It supports you in all the right places, prevents physical irritation, muscle aches and fatigue and is easy to adjust to suit you in terms of height, seat depth and tilt.

The seat material should allow you to sit up easily, but you should not slide off. In addition, you should be able to clean it easily. Maybe in your industry it should even be fire-retardant or moisture-repellent. The chair should be stable. Your feet should have good access to the floor, or you should have a footrest at your disposal. And if you have a slightly longer stature, the seat depth should be extendable so that your upper legs get the support you need. The seat and back should be firm and comfortable at the same time, and your posture should be as natural as possible while sitting, so that you automatically sit as relaxed as possible. This, and much more, can be found in Score's seating solutions.

Stepless backrest with an even curve that supports the lower part of the back and lumbar region

Inclination of the backrest and seat can be easily adjusted

The backrest and seat are quick and easy to adjust in height

Seat depth large enough to shift position regularly, for tall people with extendable seat

Rotates smoothly, has a 5 star base and a circumference that suits the situation

Wider backrest and seat for large and/or tall people

Armrests can be adjusted in height, width and depth

Almost flat seat that is rounded at the front extra wide for large people

Easily adjustable gaslift height adjustment

When people start a new job, they often just take their seats and the focus is more on their new colleagues and the work rather than on how they sit. This makes sense. Nevertheless, it is important to also pay a little attention to how you sit, and to adjust your chair properly.

Important for an optimal sitting posture is that you sit relaxed. For this, your joints should be in a neutral position - i.e. not at an uncomfortable angle. Sitting in the same position for long periods should require as little muscle strain as possible. And you should have room to vary your posture while sitting. The latter means that the seat is large enough and that you have enough room to move your feet. And then, of course, there are the settings of your chair. We'll go through those in the steps opposite.

Set your chair to the correct height

Just sit down and relax your shoulders. Place your hands on the work surface and make sure your forearms are at a 90-degree angle to your upper arms when setting your correct seat height.

Set your footrest

If you sit at the correct seat height, your hip and knee joints will form a right angle and your feet will be flat on the floor. Is the latter not the case (dangling legs)? Then you need a footrest.

Set your back support

Adjust the height of your backrest so the curve fits nicely into the curve of your back. This way, the backrest fits nicely and supports your back in the right place.

Set your armrests

Adjust your armrests to the correct height, width and depth. Relax your shoulders and let your arms hang down and rest your forearms on the armrests so your upper arms and forearms form a 90-degree angle.
