

A good work chair helps you do your job. It helps you stay focused, even after hours of desk work or precision work in the same position. It supports you in all the right places, prevents physical irritation, muscle aches and fatigue and is easy to adjust to suit you in terms of height, seat depth and tilt.

The seat material should allow you to sit up easily, but you should not slide off. In addition, you should be able to clean it easily. Maybe in your industry it should even be fire-retardant or moisture-repellent. The chair should be stable. Your feet should have good access to the floor, or you should have a footrest at your disposal. And if you have a slightly longer stature, the seat depth should be extendable so that your thighs get the support you need. The seat and backrest should firm and comfortable at the same time, and your posture while sitting should be as natural possible, so you automatically sit as relaxed as possible. This, and much more, can be found in Score's seating solutions.

Functional design and anatomically shaped with optimal pressure distribution. The seat ensures a healthy working posture, without slipping off

Available in various mechanisms, including our unique Balance mechanism that moves subtly along with you

The upholstery is easy to clean, sufficiently ventilated, not too rough and not too smooth

Easily and quickly set the correct working height

A strong stable base with at least 5 toes equipped with smoothly running castors
