experts in seating[®]

Doing your job with ease. If you can do that then you're a true professional. This also applies to all our expertise. You don't notice it – and that's exactly what makes the difference. Because after a day of sitting at work on one of our saddle chairs, you still feel great. No lower back pain. No sore shoulders. No restless feeling in your legs. Because we're professionals who invisibly take care of other professionals. And we're very proud of that. With us you'll be sitting pretty.

Take a seat.

Sitting ergonomically so you can work comfortably and feel fit and flexible. That's our goal. To achieve this, we develop and manufacture ergonomic work chairs that really make a difference. Exercise is important, but we believe sitting has to be healthy as well. And that can be done on a saddle chair, because it invites you to sit actively.

'We' are the approximately sixty problem solvers who are Score. We develop and manufacture our seating solutions in our own factory in Tolbert, in the province of Groningen in the Netherlands. We apply the most recent ergonomic standards, the latest techniques and best materials while taking all the challenges faced by people in sedentary professions into account. People stand at centre stage with us. Or better said, sit!

our own path

At Score, we like to do things our own way. Maybe our designs aren't trendsetting, innovative or super modern, but they are solid, robust and a little quirky. Solid chairs that you can literally use for decades. We don't follow the crowd but pave our own way! We listen to our customers' experiences and base our plans on what they tell us. When we see opportunities for improvement, we investigate together to see how they can be implemented. This has made us a reliable player in the market over the years.

our mentality

We value our relationships very much. Connecting people with short communication lines, honest and transparent; that's what we stand for. We want the best for everyone, both internally – for our colleagues – and externally – for dealers and customers who takes a seat on our products. If you are able to enjoy doing the things that are important to you, and we can contribute to that in our own way, then we're satisfied.

we take the burden off you

You deserve the perfect saddle chair. One you never have to worry about. This may sound a bit vague, but what matters is that our craftsmanship takes the burden off of you. There's always room for improvement. Whether it's our processes, products or your sitting posture. Because we may have great ideas, but it's your experience that counts. We improve ourselves by listening – to the market, to the developers of new technologies and to you as a user. Learning by listening. That's Score.

our promise

We are problem solvers. Every component in our saddle chairs has a function and everything is there for a reason. Because quality is all about the details. That's why we call ourselves experts in seating. We know the ins and outs of the various industries we develop our saddle chairs for. Even yours. So we work every day to ensure that you experience this too. That while you're sitting, you really feel that we're thinking along with you... and ahead. We find solutions to problems you didn't foresee yourself. With an eye for detail, with passion and inspiration. Sitting comfortably so you can concentrate on doing your job. That's our promise to you.

a saddle chair for every workplace

There's simply no such thing as one universal (work) chair, perfect for every user and work environment. Different requirements apply to a chair in a workshop than to an office chair. At Score, we made a distinction between four major branches – Dental, Medical, Industry and Office – each with their own specific work stations and associated activities. So we developed a range of seating solutions that take into account both workplace-related requirements and the wishes of the user. After all, sitting comfortably and ergonomically while working is paramount at Score. Let's start with the different branches we make chairs for and why.

Dental, Medical, Industry, Office

For use in both the Office and Dental branch, Score has developed ergonomic saddle chairs, but you can also find them in care and industry settings. The various fabrics with different colours, including some versions that meet high hygienic and/or ESD requirements, mean our saddle chairs can be used in a variety of workplaces. The seat has been formed anatomically for extra sitting comfort and you can add a lumbar support to the saddle chair for extra support of the lower back. This is how we ensure you sit relaxed and full of energy at work so you can focus on your job. That's why you choose a saddle chair.

We've got your back!

Check
scoreseating.com
for our entire
product range!

Of course, our work does not stop at developing, producing and selling chairs. We also give advice, think along and answer every question you have. That's service.

service and warranty

Score saddle chairs are made with craftsmanship from high-quality durable materials in our own factory in Tolbert and are exported to more than 50 countries. Our saddle chairs have a standard 5-year warranty. Ask about the exact conditions.

extensive dealer network

Score supplies nationally and internationally through selected dealers only. There's always a Score dealer nearby. Well-trained workplace advisors at Score can advise on the best saddle chair for your specific workplace in consultation with the Score dealer.

fast delivery service

Through our special fast delivery service, we ship a selection of high-demand saddle chairs within 3 business days. Ask about the exact conditions.

trial period

See an interesting seating solution? Ask your dealer about the possibilities to try out a product.

showroom

You're also welcome to visit our showroom, which makes it very easy to compare a number of different saddle chairs. From the Score Amazone to the Score Jumper and from the Score Jolly to the Score Polo, with Balance mechanism, lumbar support or other options and accessories: if you make an appointment in advance, our experts will be happy to discuss all the advantages and features of the saddle chairs you're interested in.

own product development and production

Bending steel, welding seams, drilling holes: a good product is perfect down to the smallest detail. That's why everything is done with equal care at Score: from assembly to packaging. In our own factory in Tolbert, our technical professionals work on our products with great precision. Products we develop ourselves! And our factory and office are located right next to each other. This means the communication lines between our product developers and production employees are short, allowing us to respond quickly to dealers and customers. We all work with heart and soul on new seating solutions that meet the current ergonomic standards and we keep everything in-house. We enjoy working together and being inspired, but we're also specialists and convinced of our expert craftsmanship. We do it our own way. That's Score!

why choose a score saddle chair?

Simply sitting comfortably while doing your job? Then we have just the thing for you: a Score saddle chair. Because it actually combines the best of both worlds: on the one hand, the healthy posture of standing and, on the other hand, the stability and comfort of traditional sitting. Upright, in a relaxed, comfortable posture that feels natural for your back, neck, shoulders and arms. So your body can function optimally while you're working. Sitting this way is not only much healthier, it also makes you feel more fit, allows you to concentrate for longer periods of time and, at the end of the day, you'll still have energy left for other things.

prevent sick leave

Because employees who sit a great deal, stand a lot or have to make repetitive movements, often force their bodies into a certain position for long periods of time. If it is an unnatural position, this could lead to physical complaints in the long term and possibly even long-term sick leave. Investing in 'sitting right' has a quick return on investment. It's one of the few affordable ways to prevent sick leave. Happy employees, happy employers!

Reasons to choose a Score saddle chair!

how to sit healthily on a saddle chair

Slouching is out of the question on a saddle chair. Because even when you're tired, a saddle chair makes sure you maintain a natural and active sitting position. And that's what we mean by the best of both worlds. Your body automatically stays healthily upright on a saddle chair, while you still sit relaxed. That is the philosophy behind the Score saddle chair.

how to find the correct setting

Are you sitting actively, yet comfortably and relaxed? Then you have correctly adjusted your saddle chair. But how do you do this? When sitting on a saddle chair, it's important to sit as high as possible while your feet remain on the floor. The angle between your upper leg and body - at the height of your hips - is also called the 'open hip angle'. Ideally this is approximately 125°. Your pelvis tilts, automatically resulting in a 'neutral position' (S-curve in your spine) for your body. And that's what prevents back, neck and shoulder pain. In short: with the right settings, you can sit comfortably on a saddle chair while getting on with your work.

Promotes the natural s-curve in your spine

Tilts the pelvis

Optimal is to place your legs at an open hip angle of about 125°

*Optimal is to place your legs at an open hip angle of about 125°
Place your legs in a slightly spread position so you can roll back and forth easily.*

1

how do you set your saddle chair to the right height?

Or in other words: what's the perfect saddle chair for your height? This might be the most important aspect when choosing a saddle chair. Because you don't want your feet dangling above the floor, because that's really not comfortable. In the overview on the next page you will see which saddle chair best suits your height.

With the gaslift height adjustment lever, you set the height of your saddle chair so that your hip angle is wide enough that you can put your feet flat on the floor in a relaxed position. Then adjust your desk to the correct height.

2

what is the perfect fit?

Wider, narrower, compact or with a bicycle seat? There are two seat shapes to choose from for the saddle chair: the narrower Score Amazone and the slightly wider Score Jumper. We also have the playful Score Jolly with its bicycle seat and the compact Score Polo with Amazone or Jumper seat with its flexible base that moves along with you.

3

which mechanism or base do you choose?

Do you choose the unique Balance mechanism that makes the saddle move along with you and has a positive effect on your muscles and spine? You can adjust the amount of movement with a ring under the saddle seat. Or do you simply choose a fixed or adjustable sitting angle? The latter allows you to tilt the seat forward and backward for an optimal open hip angle. The flexible base of the Score Polo allows dynamic adjustability of 4 degrees.

4

extra support?

Choose a lumbar support or armrests for extra support for your (lower) back or arms. For a multi-purpose support, go for the 360° Support, which, as the name already reveals, can be rotated 360°. This means that you can use it not only as support for your arm or lumbar area, but also as abdominal support. Choose the foot-operated height adjustment to set the correct height of your saddle chair while keeping your hands free for work. Really super handy!

choose the right saddle chair

Choose the right saddle chair for your height!

	Score Amazone adjustable seating area or Balance, with lumbar support / Jolly	Score Amazone fixed or adjustable seating area, without lumbar support / Jolly / Polo
Low (MID25) Seat height: approx. 49 - 63 cm	< 165 cm	< 166 cm

the saddle chair that gives you energy

Together with the Score Office Amazone, the Score Office Jumper is a showpiece among saddle chairs. Ideal for ergonomic work in various working conditions. It has a slightly narrower seat than the Score Jumper. The saddle shape of the seat tilts your pelvis and your back automatically adopts a correct, natural posture. This is not only better for your breathing, but also for your blood circulation and digestion. Do you have a height adjustable desk and do you also want to sit actively and dynamically? Then this saddle stool is ideal for you.

- ☑ The Score Amazone is our saddle chair with a narrower seat
- ☑ Saddle shape promotes a healthy and relaxed back posture
- ☑ Perfect for high workstations and workstations with little legroom
- ☑ Alternating standing and sitting

a world of possibilities

Water resistant. Conductive. Fire retardant. Ventilating. Each fabric and each material has its own unique properties. Handy, because the many various working environments require different seating solutions. But we think further than just the practical aspects. Many of our fabrics and materials are available in a wide range of colours you can choose from. Because we like to give people as many options and accessories as possible, so they get a chair that suits them even better. Here's a list of all of them.

our chair, your fabric

Want to send us your own fabric? Even that's possible at Score. If you purchase and deliver the fabric to us (minimum roll width of 1.40 metres), we'll use it for the upholstery. There is an additional cost; you can find the details on our website. We cannot be held liable for the warranty, product quality and processing of the fabric. Want to learn more or discuss? Feel free to contact us. We're here to help you find solutions.
