

# We did it! we made an amazing chair!

**NEW**  
the adjustable lumbar support on the Score Balance mechanism!

Score<sup>®</sup>

# try this innovation

and discover the Score Balance  
with adjustable lumbar support

## Perfectly fitting lumbar support

The adjustable lumbar support has a compact design that keeps the Score Balance mechanism perfectly balanced, which can be felt immediately when sitting.

## Customisable comfort

The lumbar support is very easily adjustable in height and depth.

## Easy sharing

The simple adjustment mechanism makes it effortless to share the Score Balance stools with adjustable lumbar support with colleagues.

## Professional design

No parts sticking out, suitable for intensive professional use.

## Dynamic sitting

The subtle adjustment with the adjustable lumbar support provides an extremely comfortable experience, ideal for dynamic sitting and working.

## Comfortably upholstered

With PUxx® or Stamskin® leatherette, which are ideal for hygienic and professional working environments.

## Score Balance mechanism

This mechanism very subtly moves 360° with you as you change your posture, controlling the intensity of movement with a rotating ring.

# score

## experts in seating

We strive for you to be healthy and comfortable at work. It is our goal that you feel fit and energetic; during and after work. For more than 45 years, Score has been developing and producing ergonomic work chairs and matching accessories that make a difference in the workplace. In the meantime, we have been able to make many professionals happy with a Score seating solution. We believe that sitting should be dynamic and sitting.

Our products are developed based on ergonomic standards, have been tested for a professional working environment and use very high-quality materials for a long service life. We know the different work situations and we take into account the specific challenges that professionals face. At Score, we like to have our own approach. We don't blindly follow trends, but determine our own course. Above all, we make solid chairs that literally last for decades. We listen to our customers and if we see opportunities or improvements and we look together with them at where we can realize them. This new lumbar support on the Balance mechanism is a perfect example of this. As a result, we have become a reliable player in the market over the years. In this way, we ensure that you can do your work with energy and relaxation.
