experts in seating[®]

Doing your job with ease. If you can do that then you're a true professional. This also applies to all our expertise. You don't notice it – and that's exactly what makes the difference. Because after a day of sitting at work with one of the Score footrests you still feel great. No restless feeling in your legs if your feet can't reach the floor while sitting. That's why we developed our footrests. Because we're professionals who invisibly take care of other professionals. And we're very proud of that. With us you'll be sitting pretty.

Take a seat.

Sitting ergonomically so you can work comfortably and feel fit and flexible. That's our goal. To achieve this, we develop and manufacture ergonomic work chairs that really make a difference. Exercise is important, but we believe sitting has to be healthy as well.

'We' are the approximately sixty problem solvers who are Score. We develop and manufacture our seating solutions in our own factory in Tolbert, in the province of Groningen in the Netherlands. We apply the most recent ergonomic standards, the latest techniques and best materials while taking all the challenges faced by people in sedentary professions into account. People stand at centre stage with us. Or better said, sit!

our own path

At Score, we like to do things our own way. Maybe our designs aren't trendsetting, innovative or super modern, but they are solid, robust and a little quirky. Solid chairs that you can literally use for decades. We don't follow the crowd but pave our own way! We listen to our customers' experiences and base our plans on what they tell us. When we see opportunities for improvement, we investigate together to see how they can be implemented. This has made us a reliable player in the market over the years.

our mentality

We value our relationships very much. Connecting people with short communication lines, honest and transparent; that's what we stand for. We want the best for everyone, both internally – for our colleagues – and externally – for dealers and anyone who takes a seat on our products. If you are able to enjoy doing the things that are important to you, and we can contribute to that in our own way, then we're satisfied.

we take the burden off you

You deserve the perfect footrest. One you never have to worry about. This may sound a bit vague, but what matters is that our craftsmanship takes the burden off of you. There's always room for improvement. Whether it's our processes, footrests or your sitting posture. Because we may have great ideas, but it's your experience that counts. We improve ourselves by listening – to the market, to the developers of new technologies and to you as a user. Learning by listening. That's Score.

our promise

We are problem solvers. Every component in our chairs and footrests has a function and everything is there for a reason. Because quality is all about the details. That's why we call ourselves experts in seating. We know the ins and outs of the various industries we develop our footrests for. Even yours. So we work every day to ensure that you experience this too. That, while you're sitting, you really feel that we're thinking along with you... and ahead. We find solutions to problems you didn't foresee yourself. With an eye for detail, with passion and inspiration. Sitting comfortably so you can concentrate on doing your job. That's our promise to you.

a chair for every workplace

So many professions, so many seating solutions. Score has a suitable chair for (almost) every work environment, and you'll find us at the most diverse workplaces. Even in branches where chairs must meet very specific requirements. Because whether you work on the assembly line or behind the cash register, are an office worker or (dental) healthcare professional, work in industry or in education: at Score we believe that everyone should be able to sit healthy.

Whatever you do, wherever you work. That's why we developed chairs for a wide range of branches. They're available in various fabrics and colours, you can add handy options for extra support, they meet high hygienic and/or ESD requirements when necessary and, of course, they sit like a dream.

And our footrests? They complete the circle. It's for good reason we've sold hundreds of thousands of them worldwide. This is how we ensure you sit relaxed and full of energy at work so you can focus on your job.

We've got your back!

Check scoreseating.com for our entire product range!

Of course, our work does not stop at developing, producing and exporting chairs. We also give advice, think along and answer every question you have. That's service.

service and warranty

Score footrests are made with craftsmanship from high-quality durable materials in our own factory in Tolbert and are exported to more than 50 countries. Our footrests have a standard 5-year warranty. Ask about the exact conditions.

extensive score dealer network

Score supplies nationally and internationally through selected dealers only. There's always a Score dealer nearby. Well-trained workplace advisors at Score can advise on the best footrest for your specific workplace in consultation with the Score dealer.

fast delivery program

Through our special fast delivery service, we ship a selection of high-demand products within 3 business days. Ask about the exact conditions.

trial period

See an interesting footrest? Ask your dealer about the possibilities to try out a product.

showroom

You're also welcome to visit our showroom, which makes it very easy to compare a number of different footrests. If you make an appointment in advance, our experts will be happy to discuss all the advantages and features of the footrest you're interested in.

own product development and production

Bending steel, welding seams, drilling holes: a good product is perfect down to the smallest detail. That's why everything is done with equal care at Score: from assembly to packaging. In our own factory in Tolbert, our technical professionals work on our products with great precision. Products we developed ourselves! And our factory and office are located right next to each other. This means the communication lines between our product developers and production employees are short, allowing us to respond quickly to dealers and customers. We all work with heart and soul on new seating solutions that meet the current ergonomic standards and we keep everything in-house. We enjoy working together and being inspired, but we're also specialists and convinced of our expert craftsmanship. We pave our own way. That's Score!

“Prevent a sleeping feeling in your legs by using a Score footrest.”

People generally spend more time sitting than standing. At home, but mainly at work. And that's not good for our bodies. Because doing your job standing is not always an option, we at Score focus on seating solutions, because we believe that sitting should also be healthy.

preventing sick leave

When you sit properly, you work more pleasantly and more concentrated. Whether you are working on the assembly line, working in a cleanroom or in a factory. At the end of the working day, you have more energy left to do fun things at home and you prevent physical problems in the longer term. Because employees who sit a lot – have to stand for a long time or make repetitive movements for their work – often force their body into a certain position for a long period of time. When your sitting posture is wrong, it quickly leads to physical irritation and fatigue, which in the longer term can lead to physical complaints, with long-term sick leave as a possible result.

Investing in 'good sitting posture' is a golden investment for companies and quickly pays for itself. It's one of the few affordable ways to increase employee productivity and prevent sick leave.

*Happy employees,
happy employers!*

For advice, please contact one of our advisors.

No more pinched, 'sleeping' legs thanks to the footrest that you can adjust to the correct height

Avoid dangling legs by adjusting your footrest to the right height

The tilting footboard automatically moves with the position of your feet for relaxed ankles and good support

sitting comfortably so you can concentrate on doing your job?

That's only possible in a natural position. And you only do that if you can sit up straight, relaxed and comfortable with your feet firmly on the ground. This puts minimal strain on your back, neck, shoulders and arms and your body has plenty of room to function optimally while you're sitting. You'll feel fitter and be able to concentrate longer. For those with a smaller stature or a somewhat higher workplace, a footrest is indispensable. Because when your feet dangle above the floor and your upper legs are pinched by the chair seat it costs your body a lot of energy. A footrest provides the support you need and ensures optimal blood circulation. You're not alone: we've literally sold hundreds of thousands of them worldwide.

Score footrests aren't just practical, durable and comfortable, they're also very user friendly. Exactly what you can expect from us, always. They're available in three lines: the compact and easy-to-use Basic Line, the Pro Line with anti-slip foot plank and the elegant round Discus Line, which can be adjusted in height with a gaslift. Whichever you choose, they all ensure a good, healthy sitting position so you can perform your work better and prevent dangling, sleeping and/or restless legs.

All this makes your job a little more comfy!

The benefits of a footrest

What exactly are the benefits of using a footrest? Here's a handy list for you.

A footrest...

1

... prevents pinched legs by the right working height.

2

...provides good support for your feet while sitting. This helps **good blood circulation.**

3

...prevents **restless legs.**

4

...helps **working standing up.**

5

...helps you feel **fitter at the end of the work day.**
